

*It is blissful to be blessed with a child & magical to see your offspring grow...*

## Testimonials

Dr K.D. Nayar & his team has made this dream true for us after a long, long wait. We came to Akanksha Clinic in August after wandering here & there for as much as 7 years. After careful examination & tests etc, Dr K. D. Nayar suggested us to go for IVF. With the efforts of Dr K. D. Nayar & his team, I conceived in October 2013 & now waiting to be called as MOM.

Knowledge of Dr K. D. Nayar is beyond doubt and his skills are outstanding.

I thank the entire team of Akanksha IVF Clinic specially Dr K. D. Nayar to help us and make us feel blessed.

We are married since 2001. We could not get a child through natural process. We came to MCDH for treatment where we met Dr K. D. Nayar. He made several tests of both of us. After that we have got our first child in Feb 2008 and then second child in Dec 2013 through IVF-ICSI with the help of Dr K. D. Nayar and his cooperative and dedicated team. We are thankful to him & his team for giving us happiness for life. Akanksha IVF Centre is ray of hope for childless couples. Dr K. D. Nayar has full knowledge and experience about every problem of a childless couple. I am obliged to him and his team. I want to say to every couple who do not have a child to have patience and believe in God and take proper treatment. Akanksha IVF Centre is best in Delhi thanks to Dr K. D. Nayar and his entire team.

The desire to have an offspring takes human beings to so many places, from doctor to deity, from clinics to clerics. Even we were going from doctor to doctor in hope of a child but it was all in vain! We were disappointed, frustrated and felt hopeless! That was the time when our family doctor Dr Meera Gupta informed us about Dr K.D Nayar & referred us to Akanksha IVF Centre in Mata Chanan Devi Hospital. Dr Nayar heard all our problems patiently specially the presence of cervical fibroid and then suggested IVF treatment. Our minds were full of many misconceptions and fears related to IVF treatment but Dr Nayar explained us everything we needed to know about our treatment.

Dr Nayar's Akanksha IVF Centre has a dedicated and sincere team of doctors and staff who helped us medically as well as emotionally. Although we still had some fears, but keeping our trust in him and his team, we went ahead with the treatment.

The first breakthrough came in March 2013 when I got pregnant! Our hearts were full of joy! Dr Nayar and his team took very good care of me. We followed the advice given by the team religiously. Finally on 18th of Nov 2013 we were blessed with Twin boys! It was a moment of extreme joy and we feel truly blessed.

Today we are proud parents of two amazing little boys our bundles of joy. We want to express our deepest regard to almighty God and to Dr Nayar & his team for the wonderful work that they are doing!
